## REFERENCE COPY OF TECHNICAL DOCUMENTATION FOR ACCESSIONED ELECTRONIC RECORDS (Copied: November 7, 2005)

### SERVICE SEGMENT DATA DATA BANK 23, 1970-1984 DOCUMENTATION CONTROL NUMBER: B1

#### Record Group 197 Records of the Civil Aeronautics Board

The National Archives and Records Administration (NARA) has been accepting electronic records into its holdings since the early 1970s. Technical documentation has accompanied each transfer of electronic records. The documentation is necessary to understand the meaning of the digitized bits of information within the electronic records.

Over the decades, NARA has had different procedures for compiling technical documentation into an organized unit for researchers, and different expectations regarding the content and extent of any NARA-produced portions of the documentation. Consequently, the structure, organization and contents of the documentation reflect the procedures in place when the technical documentation was compiled and arranged and may include out of date addresses, telephone numbers, or other items of unrevised information related to the agency that created or transferred the documentation and electronic records to NARA, to the NARA unit that processed these materials, or to the physical media of the electronic records files.

In creating the reference copy of the documentation package, NARA staff have selected from the technical and/or supplementary documentation available for this series or file(s). We have annotated or highlighted the table of contents that follows to indicate which portions of the full documentation for this series or file are included in this reference copy of documentation. Any materials not included here are available upon request. Any user notes prepared after the table of contents was prepared appear before the table of contents. This documentation will differ in structure, organization and contents from technical documentation for other series or files of accessioned electronic records. The readability and visual quality are also variable.

Accession Number: NN3-197-89-1

## Introduction

### Agency Background Information

The Civil Aeronautics Board (CAB) was established within the Department of Commerce under Reorganization Plans 3 and 4 of 1940, effective June 30, 1940. The Board was made an independent agency by the Federal Aviation Act of 1958 (72 Stat. 731), effective January 1, 1959.

The CAB was given responsibility for regulating economic aspects of air carrier operations, promulgating safety standards, investigating accidents, and promoting international air transportation. The CAB authorized domestic air carriers to engage in interstate and foreign transportation and regulates the operations of foreign air carriers in the United States. It had jurisdiction over subsidies paid air carriers and over tariffs, rates, and fares charged for air transportation and for carrying the mail. The CAB, which regulated the accounting procedures of air carriers and their financial and business relationships, required the carriers to file regular financial and operating reports and made that data available to other Government agencies and the public.

The Civil Aeronautics Board (CAB) ceased to exist (sunsetted) on December 31, 1984. Beginning on January 1, 1985, air carrier reports were handled by the Department of Transportation (DOT), Research and Special Programs Administration (RSPA), Office of Aviation Information Management.

### National Archives (NA) Background Information

At one time the National Archives operated a depository for non-archival machine-readable records of high current interest, which have been made, received, or acquired by Federal agencies. Under the terms of inter-agency agreements of September 9, 1977, January 2, 1979, November 14, 1979, and March 25, 1982, CAB transferred copies of many of its machine-readable data files to the physical custody of the National Archives. The National Archives offered reference on these data files.

These records were not appraised at the time they were deposited in the National Archives. In 1982 and 1983, these records were scheduled and many appraised as permanent in Jobs NC1-197-82-1 and NC1-197-83-1. In April 1986, RSPA signed Standard Form (SF) 258,

"Request to Transfer, Approval, and Receipt of Records to National Archives of the United States" this action started the process to formalize the change in status of the permanent machine-readable files produced by the CAB which were now under RSPA's jurisdiction. The SF 258 [NN3-197-89-1](Attachment 1) covers the formal transfer of all permanent machine-readable files CAB produced through December 1984. The attachment to the SF 258 lists the files/surveys; Request for Records Disposition Authority (SF 115) citation, source/producer of the file, number of reels, and "permanent" inclusive dates. (See Attachment 2)

## National Archives Processing Information

### *Terms*

Accession Number: A National Archives assigned number for agency's permanent records, that are transferred to the legal and physical custody of NARA. (Example: NN3-197-89-1)

Control Number: These numbers are based on the attachment to the SF 258 (Attachment 2). Some series have the same title but the control number and date span will be different. In these instances, this indicates to the user that there was a change in the record layout.

Record Group (RG): A body of organizationally related records established by an archival agency after considering the organization's administrative history and complexity and the volume of its records. The National Archives uses record group numbers to keep track of agency records during and after the scheduling process, including those transferred to Federal records centers and/or the National Archives.

RG197: Records of the Civil Aeronautics Board

RG 467: Records of the Research and Special Programs Administration  
(Transportation)

Series Title: Obtained from information on CAB Master Data File Description or the "survey" title listed on the attachment to the SF 258 covering [NN3-197-89-1].

\*\*\*\*\*  
When the National Archives decided to formally accession the files warranting long-term preservation, validation and preservation work started. Because of the large number of files requiring preservation (677 magnetic tapes), there was a reluctance to approve the SF 258 without some preliminary validation and preservation work. Based on this preliminary work, the Machine-readable Branch (NNXA) decided to approve the SF 258 in June 1989. It was anticipated that NNXA might encounter some problems with a few tapes, but would be able to secure another copy of the file or would be able to document the problems sufficiently to support reference use of the files.

There are numerous data sets covered by accession NN3-197-89-1. If the National Archives was able to successfully copy the data set and if adequate documentation existed and there are no major discrepancies between the data and the documentation then these data sets are included in this documentation package. The documentation package is divided into surveys/series. (Please see Attachment 2) Each survey is assigned a "Control

Number" which is based on the information in the Attachment to the SF 258. Within a series, there may be more than one record layout that applies to the various data sets. If a series/survey has more than one record layout, I assigned different "Control Numbers" e.g., B9a and B9b.

Grand Total = 260

\*\*\*\*\*  
 There are documents that are common to all of the completed series, except for Control Number B12, Data Bank 5. Data Bank 5 documentation package was completed prior to my involvement with this project. Please see a separate documentation package covering Data Bank 5, (1969 Quarter 3, 1969 Quarter 4, and 1970 Quarter 2 - 1985 Quarter 4). The rest of the series will include a cover page, table of contents page, agency record description, technical description and supplemental information page, validation statement, codebook list, codebook(s), and sample computer dump(s). Agency documentation varies from series to series.

*NA Created Documents Include the Following:*

Codebook List: Provides information about the codebooks used during the validation/verification process.

Sample Computer Printouts: One printout for each data file. NARA staff copied the CAB tapes and then produced two NARA created copies. For the most part, the printouts are dumps of some records from the NARA created copies and the printouts are character representation of the bit pattern usually from the first part of each file.

Table of Contents: Provides the control number, list of the documentation and page count for most sections in a series. Under the first National Archives section of the Table of Contents, "Format X" is listed. Please disregard this item, there are no pages for this item in any series. This introduction is another item listed in the Table of Contents; Control Number B7 is the only series that has the page count listed for this item

Technical Description & Supplemental Information Sheet: Provides useful technical information about each series (data set title, data set short title with date coverage, number of logical records, character set and record format). In addition, supplemental information is provided about the inclusive dates of the permanent records. Based on the dates provided on the attachment to the SF 258 (NN3-197-89-1) it would appear that some data sets are missing from this accession; see Control Numbers [A1a, A1b, A1c, A1d, B4, B10, B12, and B19]. During the processing of this accession, all attempts were made to include all the CAB data sets appraised as permanent. If data sets were missing, NARA sought to obtain replacements from RSPA. If NARA had any problems copying all of the records in a data set, an explanation is provided. (See Control Numbers B7 and B11X respectively).

Under ideal circumstances, only permanent records should be included in this accession. There are instances in which data sets outside of "permanent inclusive dates" are included. For example, see Control Number B11X. I determined that if the series existed and NARA was able to make a copy of the data set, then I would include the data in this accession.

NA User Note: Provides information that would be helpful to users of the data. An example is user note "Subject: SAS Frequencies Run on Several Data Elements" Control Number A4.

Validation Statement: Based on a comparison of the data with the available agency documentation, NARA staff validated two records from each data file that NARA had copied. Any discrepancies noted are listed in this document.

#### *Anomalies*

1. National Archives staff found a need to create a revised record layout for Denied Boarding (Control Number A4). The National Archives staff created record layout is based on the CAB Record Description.
2. Some records appraised as temporary are included in the documentation package. [Please see Control Numbers B4, B5, B6, B11X, B13, B13X, and B21]
3. Due to a technical problem, the National Archives was not able to successfully copy three data sets listed for Control Number B7. On April 11, 2000, the Archivist of the United States approved the disposal of these data sets.
4. Some series include RSPA data sets (any data set created after December 31, 1984): [Control Numbers B3, B9b, B11, B12, B17, B18, and B20]

5. Domestic Air Freight Investigations / Priority Air Freight Investigations (DAFRI/PRAFRI), Control Number A2 is excluded from this documentation package. During this accessioning process, National Archives staff did not have access to a CAB File Description/record layout for DAFRI/PRAFRI. We did have a copy of a National Archives created record layout "Domestic Air Freight-Priority Air Freight History File" dated December 1979. Unable to obtain a record layout from RSPA, the National Archives record layout was used to validate records in a data set titled DAFRI/PRAFRI. Major discrepancies were encountered during the validation process. Based on information gathered during the validation process, National Archives staff determined that the data set identified as Domestic Air Freight Investigations/ Priority Air Freight Investigations (DAFRI/PRAFRI) July 1976-February 1978, Control Number A2 is not DAFRI/PRAFRI data.

Attachment 1 --- SF 258 [NN3-197-89-1] {one page}

Date: June 7, 2000

## Notes for All CAB Magnetic Tape Files

1. All Civil Aeronautics Board Magnetic tape files are recorded in 9-track, 800BPI mode with odd parity. They are created on IBM equipment under the IBM Disk Operating System.
2. Where labels are referred to as "standard", it means standard as defined by IBM for its System 360 under the Disk Operating System.
3. On File Definition sheets, under "FILE LABEL INFORMATION", the data between apostrophes is the actual file identification which should appear in the TLBL card when processing the file.
4. Fields with no field description entry are considered self - explanatory.
5. All sort sequences shown are in ascending order unless otherwise specified by the notation "(D)" beside a sort field.
6. Record descriptions contain several columns which require coded entries. The following notes contain the codes and meanings for those columns:

### a. Column headed "Justified"

<u>Code</u>	<u>Meaning</u>
R	Data is stored beginning at the rightmost position of the data field and filling to the left. Fill characters occupy any positions at the left which are unfilled by data.
L	Data is stored beginning at the leftmost position of the data field and filling to the right. Fill characters occupy any positions at the right which are unfilled by data.
- (dash)	One position fields or fields which are always completely filled with data.

### b. Column headed "Fill Char."

<u>Code</u>	<u>Meaning</u>
	Unused data positions filled with the EBCDIC representation of a space.
- (dash)	Field will always be completely filled with data.
any other char.	Unused data positions filled with this character.

c. Column headed "Type of Data"

<u>Code</u>	<u>Meaning</u>
A	Data is alphabetic.
N	Data is numeric.
A/N	Data is alphanumeric.
B	Field always contains blanks.

d. Column headed "Data Representation"

<u>Code</u>	<u>Meaning</u>
Binary	Data is coded in pure binary code.
BCD	Data is coded in binary coded decimal format. (Primarily for files created by the IBM 1401 System).
EBCDIC	Data is coded in extended binary coded decimal interchange code. (An IBM developed code.)
Packed	Data is coded in packed decimal format.

7. For some files, a column may be added to the record description next to either the "Field Name" or the "Description of Data" column. When next to the "Field Name" column it contains an alternate field reference, such as a field number or coded field name as it appears in some common usage of the file (e.g., the Data Division of a COBOL program). When next to the "Description of Data" column it contains a source document item reference, such as a Form 41 account number. This permits easier cross referencing of the record description to the source document.

# National Archives

Washington, DC 20408

Date: August 20, 1992  
From: P. D. Palmer  
To: Users of CAB Data

Subject: Codebooks--Data Bank 5 SAS 10% Random Sample

City/Airport Nomenclature, Data Bank 5 (DB5) is an auxiliary file that is used with other files. The file contains alphabetic codes, numeric codes, full name spelling (up to 30 characters), abbreviated name spelling (up to 20 characters), and geographic coordinates for all cities in flight itineraries reported in the Passenger Origin and Destination (O & D) Survey.

In July 1988, National Archives staff member, Michael Meier completed a validation statement that pertained to DB5 files transferred to the National Archives. He used a 10% random sample of the data in DB5 for validation. The variables used in the sample were:

Airport Designator (APRTDSGN).....DB5SAS1  
City Airport Code (CTYAPTCD).....DB5SAS4  
Multiple Airport Alpha (MARPTAPH)....DB5SAS2  
Numeric Sequence Code (NUSEQCD).....DB5SAS3  
World Area Code (WLDARECD).....DB5SAS5

In his validation statement, Meier stated that "... 65 data sets were machine validated by using SAS and running frequencies on these variables."

According to the information provided in Meier's DB5 documentation package "Users of Data Bank 5 will be able to match code fields to corresponding fields in the other O & D files containing the same coded information. The file was updated quarterly so that it could be used with the historical O & D files. Dates should be the same when using Data Bank 5 with other files." The earliest data of DB5 that was transferred to the National Archives is 1969 Third Quarter. Data for 1970 First Quarter is missing and the Research and Special Programs Administration does not have a copy of this data set. Please note that the pages used as codebooks in this documentation package start with DB5 1973 Third Quarter; this was the earliest data set listed on the SAS sample that I used.

UNITED STATES OF AMERICA  
GENERAL SERVICES ADMINISTRATION

National Archives and Records Service  
Washington, DC 20408

Dear User:

We have received a letter from the Civil Aeronautics Board, dated January 18, 1977, informing us of the following changes in the documentation for their data files:

1. There has been a new carrier group code established. The new code is '07' and is defined as regional. The Carrier Entity Code for Air New England has been changed from '02' to '07'. The complete five (5) character code for Air New England will now be 07027. The change will be effective as of the data for the fourth quarter of 1975, and includes all Form 41 data as well as the Service Segment Files.
2. Documentation for the Service Segment Data file indicates that fields 04 and 07 contain city airport numeric codes which are made up of a city code, an airport designator, and a world area code. In fact, the airport designator is always zero in these two fields. Field 23 which is shown in the original documentation as a two position filler (positions 52 and 53), now contains the airport designators for city/airport (1) and city/airport (2), respectively.

This change is in effect on all data since 1971.

Data on all files covering the fourth quarter of 1975 will show no data for National Airlines due to a strike.

If you have any questions regarding these changes, please contact me at (202) 724-1080.

Sincerely,

*Herman H. Rugen Jr.*

## Service Segment Data File

### Introductory Notes

1. Service segment data are submitted and processed monthly. At the end of each calendar year, the twelve monthly files are merged into one file, although no annual summarization takes place. The annual file is in sequence by month, carrier, and flight number.
2. All traffic and capacity data represent totals for all performances of flight stages from the base city to the reference city of a record, for the reporting period as indicated in fields 10 and 11.
3. On Record Description sheets, a column headed " 'T' Sched. Element" has been added as part of the "Description of Data" column. The letter "X" is used as a prefix in the record description because data type may correspond to any one of several elements with the same number but with different prefixes in the Form 41 schedules. For example, element X430 in the record description may contain data of the same classification as that reported in elements A430, C430, E430, or G430 of Schedule T-1B, depending on whether field 15, "Service class" contains an "A", "C", "E", or "G", respectively.

Elements X520, X521, X430, X610, X630, X213, X214, X215, X216, and X217 correspond as indicated above directly to elements on one of the schedules T-1, T-2, or T-3. However, segment data is reported by carrier, airport and aircraft type, whereas data on the "T" schedules is summarized to exclude the detail for one or more of those categories.

Elements X511 and X512; X411 and X412; X311 and X312; X131 and X132; X111 and X112; X231, X233, X234, X235, X236 and X237 are sets of elements in the record description which correspond to an element in the "T" schedules which is a summary of the elements in the set, subject to the differences in detail between segment data and "T" schedule data noted above.

Elements X270, X150, and X250 are defined in Section 19-5 of Part 241, Uniform System of Accounts and Reports of the Civil Aeronautics Board, but are required only for the Service Segment Data file and have no counterparts in the aforementioned "T" schedules.

Elements X120 (in the fixed portion of the record) and X111, X112, X213, X214, X215, X216, and X217 (in the variable portion of the record) are undefined in the Uniform System of Accounts and Reports and have no "T" schedule counterparts. Element X120 was arbitrarily labeled, but elements X111 through X217 above, deplaning statistics for downline points, were labeled to correspond to the enplaning statistics fields (in the fixed portion of the record) for their respective categories of passengers and cargo.

4. Fields containing weight data are named in accordance with corresponding element definitions in Section 19-5 of Part 241, the CAB's Uniform System of Accounts and Reports, and have names such as "Tons available" and "Revenue tons transported". These fields, in fact, contain data reported in whole pounds, not tons. Similarly, elapsed time fields are labeled "Revenue aircraft hours..." but contain data reported in whole minutes.
5. The "Coach" passenger classification includes all revenue passengers other than first class.
6. A factor of 200 lbs. per passenger is used to calculate the weight of revenue passengers transported. This factor includes an allowance of 35 lbs. per passenger for baggage. Therefore the weight of passengers' baggage is not included in any cargo fields.
7. Flag stops (points in scheduled routings which are served only if there is traffic to enplane or deplane when flights pass those points) are considered scheduled points, and operation to a flag stop is considered a stage completed and a departure performed, even though a landing may not actually be made. Accordingly, mileages are reported to and from flag stops.
8. Technical and fuel stops are used to determine segments actually served, although they are not included as scheduled points.
9. Although data are reported and processed monthly and stored on one reel of tape, annually the twelve months of data for a calendar year are consolidated onto one file of about 8 reels.
10. Users of the file should be aware that strikes, mergers, or changes in reporting requirements for individual carriers may result in some differences in carrier entities reporting from month to month.
11. The file dated July 1970 through December 1970 does not contain data related to downline points, since these data were not required of the carriers until January, 1971. In addition, several carriers were granted waivers of this reporting requirement for part or all of the first quarter, 1971. Downline statistics for that quarter are incomplete to the extent that such waivers were granted.

12. Access to Service Segment data is restricted as follows:

- a. Data involving domestic service segments, for a period of one year following the close of the calendar year for which it is reported.
- b. Data involving international service segments, indefinitely.

Requests for access to restricted data should be directed to:

Chief, Statistical Data Division  
Bureau of Accounts and Statistics  
Civil Aeronautics Board  
Washington, D. C. 20428

13. Prior to January, 1974, field 21 "Subsidy eligible/ineligible code" was field 20 in the Service Segment Data record description and occupied position 46. Field 21 (position 47) at that time was defined as filler and contained a space. There was no Itinerary indicator field at that time.

CIVIL AERONAUTICS BOARD Record Description											File name: Service Segment Data Program which creates record: Number: 463-05 Name:		
<input type="checkbox"/> Fixed length		<input checked="" type="checkbox"/> Variable length.		Minimum length 364		Maximum length 724		Starting position of variable portion 325			Maximum number of repeating segments 9		
<input type="checkbox"/> Undefined.		<input type="checkbox"/> Minimum length		Maximum length									
Field Number	Field Name	Multi-level Field Relationships (See Note)	Unit	Field	Segment Position	Length	Data Type	Rep. Char.	Segment	Length	Segment	Length	Description of Data
01	Record length	1	R	Ø	1	2	N	Binary	-	1	"	1	The number of positions in this record including this field and field 02, which are both generated by the computer software and appended to the data record.
02	Filler	1		- -	3	2	"	"	-	1	"	1	Always contains zeroes. This field is not used under DOD.
03	Basic/Reference code			- -	5	1	A	EBCDIC	-	1	"	1	Contains a value "B" or "R" indicating whether the first airport in the record (field 04) is the segment origin or destination, respectively.
04	City/airport (1) numeric code			- -	6	5	N	Packed	-	5	"	1	A nine digit number consisting of a five digit city code, a one digit airport designator, a three digit world area code, packed into five bytes. See note 1.
05	City/airport (1) alpha code			- -	11	3	A	EBCDIC	-	3	"	1	Standard three letter city code as found in Table 1 of Section B of this manual.
06	Repeating segment count		R	Ø	14	2	N	"	-	2	"	1	A count of the number of repeating segments occurring in this record; inserted during processing.
07	City/airport (2) numeric code			- -	16	5	N	Packed	-	5	"	1	See field 04 description.
08	City/airport (2) alpha code			- -	21	3	A	EBCDIC	-	3	"	1	" " 05 "
09	Filler			- -	24	2	A	EBCDIC	-	2	"	1	"
10	Year of reporting date	2	R	Ø	26	2	N	"	-	2	"	1	Low order (rightmost) two digits of the year of the reporting date.
11	Month of reporting date	2	"	"	28	2	"	"	-	2	"	1	Standard two digit month code. Values "01" to "12".
12	Carrier operation code	3		- -	30	2	A/N	"	-	2	"	1	A code indicating for what general category of carrier operation the data in this record were generated. See Table 2 of Section B of this manual for codes.
13	Carrier name code	3		- -	32	3	N	"	-	3	"	1	A code indicating the name of the reporting carrier. See Table 2 of Section B of this manual for codes.
14	Number of downline points		R	Ø	35	2	"	"	-	2	"	1	Number of points in the routing after the segment origin.
15	Service class			- -	37	1	"	"	-	1	"	1	Contains a value "A", "C", "E" or "G". See note 2.
16	Aircraft group code	4		- -	38	1	"	"	-	1	"	1	Code indicating general category of the aircraft type reported in this record, such as "four eng. jet" or "single eng. prop." See Table 4, Sec. B this manual for codes.
17	Aircraft type code	4		- -	39	2	"	"	-	2	"	1	Code indicating the specific make and model of the aircraft type reported in this record. See Table 4 of Section B of this manual for codes.
18	Aircraft cabin configuration code	4		- -	41	1	"	"	-	1	"	1	Contains a value "1", "2", or "3" for passenger, cargo or passenger/cargo combined, respectively.
19	Flight number		R	Ø	42	4	A/N	"	-	4	"	1	A number up to four digits assigned to each flight. In most cases found in the Official Airline Guide for the period corresponding to the date in fields 10 and 11.
20	Itinerary indicator			- -	46	1	"	"	-	1	"	1	See note 5
21	Subsidy eligible/ineligible code			- -	47	1	"	"	-	1	"	1	Contains a value "Y", "1" or "2" indicating "eligible", "ineligible" or "partly eligible", respectively
22	Reference flight number		R	Ø	48	4	"	"	-	4	"	1	See field 19 description. This field is completed for extra section flights only. It contains the basic flight number to which this extra section is related.
23	Filler			- -	52	2	A	EBCDIC	-	2	"	1	"
24	Service segment position number		R	Ø	54	2	N	"	-	2	"	1	Sequence no. of this segment in relation to other segments in the complete routing.

Note: All fields are elementary data items. These columns indicate logical groupings of items to form larger items. Fields with same number in same column can be grouped.

CIVIL AERONAUTICS BOARD Record Description										File name: Service Segment Data Program which creates record: Number: 463-05 Name:		
<input type="checkbox"/> Fixed length <input type="checkbox"/> Variable length. <input type="checkbox"/> Undefined. Field Number	Field Name	Multi-level Field Relationships (See Note)		Startin g Position	Field	Length	Type of Data	Data Representation	Segment ID	Description of Data		
25	Segment Distance			R	Ø	56	3	N	Packed	-	The distance in miles between city/airport (1) and city/airport (2).	
26	Filler			-	-	59	14	6	EBCDIC	-		
27	Revenue aircraft departures scheduled			R	Ø	73	6	N	Packed	X520	The number of revenue departures scheduled from the base city, as shown in published flight schedules.	
28	Scheduled revenue aircraft departures performed.			"	"	79	6	"	"	X521	The number of scheduled revenue departures of field 27 which were actually performed.	
29	Revenue aircraft departures performed-scheduled.			"	"	85	6	"	"	X511	Of the total revenue aircraft departures performed from the base city, this field contains the number performed pursuant to scheduled service. See note 3.	
30	Revenue aircraft departures performed-extra section			"	"	91	6	"	"	X512	Of the total number of revenue aircraft departures performed from the base city, this field contains the number which were extra sections to scheduled departures.	
31	Revenue aircraft miles scheduled			"	"	97	6	"	"	X430	The number of rev. aircraft miles calculated by multiplying number of departures scheduled from the base city (field 27) by segment distance (field 25).	
32	Revenue aircraft miles flown - Scheduled			"	"	103	6	"	"	X411	The number of rev. aircraft miles calculated by multiplying number of rev. departures performed (sched.) from the base city (field 29) by segment distance (field 25).	
33	Revenue aircraft miles flown-extra section			"	"	109	6	"	"	X412	The number of rev. aircraft miles calculated by multiplying the number of extra sections performed from the base city (field 30) by the segment distance (field 25).	
34	Seats available - 1st class			"	"	115	6	"	"	X311	The total number of seats available in first class service for all performances of this segment by the aircraft type of fields 16, 17, and 18.	
35	" " - coach			"	"	121	6	"	"	X312	The total number of seats available in coach service for all performances of the segment by the aircraft type of fields 16, 17, and 18.	
36	Tons available			"	"	127	6	"	"	X270	The total payload capacity (weight) available for passengers and cargo, found by adding the capacities of the aircraft used on each performance of this segment.	
37	Revenue aircraft hours (airborne)			"	"	133	6	"	"	X610	The total revenue aircraft time flown for this segment, found by adding airborne times for the aircraft on each performance of this segment.	
38	" " (ramp to ramp)			"	"	139	6	"	"	X630	The total revenue aircraft time in operation including airborne, taxi, takeoff, and landing times for the aircraft on all performances of this segment.	
39	Rev. passengers transported - 1st clas			"	"	145	6	"	"	X131	Total no. of passengers in 1st class service on all performances of this segment.	
40	" " - coach			"	"	151	6	"	"	X132	" " " " " coach " " " " " " " .	
41	Nonrevenue passengers transported			"	"	157	6	"	"	X150	" " " nonrevenue passengers " " " " " " .	
42	Revenue tons transported-passenger			"	"	163	6	"	"	X231	The total weight of the passengers shown in fields 39 and 40. See intro. note 4.	
43	Revenue tons transported-U.S. mail - priority			"	"	169	6	"	"	X233	See introductory note 4.	
44	Revenue tons transported-U.S. mail - nonpriority			"	"	175	6	"	"	X234	" " " " .	
45	Revenue tons transported - foreign mail			"	"	181	6	"	"	X235	" " " " .	
46	" " - express			"	"	187	6	"	"	X236	" " " " .	
47	" " - freight			"	"	193	6	"	"	X237	" " " " .	
48	Nonrevenue tons transported			"	"	199	6	"	"	X250	The weight of passengers shown in field 41 plus any nonrevenue cargo carried.	
Note: All fields are elementary data items. These columns indicate logical groupings of items to form larger items. Fields with same number in same column can be grouped.												

Notes

1. This is a numeric code, consisting of three components, which is inserted into the record by CAB to facilitate further machine processing. The components are as follows:
  - (1) City numeric code. A five digit code which corresponds to the alphabetic name spelling of the city. This code is necessary for sorting since the three letter alphabetic codes frequently do not correspond to the name spelling.
  - (2) Airport designator. Many large cities have more than one commercial airport associated with them. This one digit code permits differentiation between airports of a multiple airport city.
  - (3) World Area code. A three digit code which specifies in what particular area of the world a city is located. The first digit represents a major geographic area, such as "0" for the United States, "4" for Europe, etc.; and the last two digits represent a specific subdivision of the major area, such as a state or country.

They are assembled into a single nine digit code in the order listed above, from left to right, and stored in packed decimal format in five positions of a record.

2. The service class codes refer to the classes of service available on the flight service segment of a record. Codes and their meanings are as follows:

<u>Code</u>	<u>Meaning</u>
A (0)	First class only
C	Coach only
E	Mixed first class and coach
G	Cargo only

3. This field contains the number of revenue aircraft departures performed pursuant to scheduled operations. In most cases, this figure will be the same as that in field 28. However, if the base city is not a scheduled point for the flight identified in field 19, the departures will be recorded in this field but not in field 28. (This situation can occur if a flight is diverted from its scheduled routing for any reason.)

4. Error codes and their meanings are as follows:

<u>Code</u>	<u>Meaning</u>
A	Fields 29 (Rev. dep. performed - sched.) and 30 (Rev. dep. performed - extra section) both contain non-zero values. This is not permitted within the same flight record.
B	Same meaning as for code A, except refers to fields 32 and 33.
C	Field 50 (Rev. pass. enplaned - 1st class) exceeds field 39 (Rev. pass. transported - 1st class).
D	Same meaning as for code C, except refers to fields 51 and 40.
E	Field 52 (Priority U.S. mail enplaned) exceeds 43 (Priority U.S. mail transported).
F	Same meaning as code E, except refers to fields 53 and 44.
G	Same meaning as code E, except refers to fields 54 and 45.
H	Same meaning as code E, except refers to fields 55 and 46.
I	Same meaning as code E, except refers to fields 56 and 47.
J	Not presently used.
K	Field 39 plus field 40 (1st-class and coach rev. pass. transported) exceeds field 34 plus field 35 (1st class and coach seats available).
L	Same meaning as code K, except refers to fields 50 plus 51 and 34 plus 35.
M	Same meaning as code E, except refers to fields 37 and 38.
N	Field 32 (Sched. rev. aircraft miles flown)

<u>Code</u>	<u>Meaning</u>
N (cont)	plus field 33 (Rev. aircraft miles flown - extra section) does not equal field 25 (Segment distance) times the sum of field 29 (Rev. dep. performed - sched.) and field 30 (Rev. dep. performed - extra section).
O	The sum of fields 42, 43, 44, 45, 46, and 47 (all rev. cargo and passenger tons transported) exceeds the capacity in tons available.
P	200 times the sum of field 39 (Rev. pass. transported - 1st class) and field 40 (Rev. pass. transported - coach) does not equal field 42 (Rev. tons transported - pass.).
Q	Field 50 (Rev. pass. enplaned - 1st class) does not equal the sum of field 63 (Rev. pass. deplaning - 1st class) and the corresponding field for each downline point.
R	Same meaning as code Q, except refers to fields 51 and 64.
S	Same meaning as code Q, except refers to fields 52 and 65.
T	Same meaning as code Q, except refers to fields 53 and 66.
U	Same meaning as code Q, except refers to fields 54 and 67.
V	Same meaning as code Q, except refers to fields 55 and 68.
W	Same meaning as code Q, except refers to fields 56 and 69
X	Field 32 (Rev. aircraft miles flown - sched.) or field 33 (Rev. aircraft miles flown - extra section) contains data but field 37 (Rev. aircraft hours (airborne)) or field 38 (Rev. aircraft hours (ramp to ramp)) contains zero.

<u>Code</u>	<u>Meaning</u>
Y	Field 14 (No. of downline points) is not equal to the number of downline points reported in the variable portion of the record.

5. Flights under one flight number for a given carrier may fly different itineraries some days of the month. These variations may be scheduled or may be due to weather conditions, mechanical problems or other special circumstances.

One or more segments of some of the itineraries may be identical. This itinerary code permits differentiation of the identical segments within different itineraries. A different alphabetic code (beginning with the letter A and continuing consecutively) is assigned to each unique itinerary. For example, if a flight is scheduled to serve points A-B-C-E every day during a month and does so on twenty nine days, but flies A-B-C-F one day and A-B-C-D-E another day, the segments appear as follows:

<u>SEGMENT</u>	<u>ITINERARY CODE</u>
A - B	A
A - B	B
A - B	C
B - C	D
B - C	E
B - C	F
B - C	G

Under the then existing summarization criteria, prior to January 1, 1975, segments such as those illustrated above have been summarized into one record for each of the segments A-B, B-C, C-D, C-E, C-F, D-E. Since the itinerary indicator is now one of the summarization criteria, each of the segments illustrated appears in a separate record after that date.

Some carriers have used a code of zero or space in records reporting flights with only one itinerary, so these codes may appear along with alphabetic codes.

TECHNICAL DESCRIPTION & SUPPLEMENTAL INFORMATION

Data Set Title: Service Segment Data,  
Data Bank 23

Short Title	Number of Logical Records and Bytes	Character Set	Record Format

Validation Statement  
Service Segment Data,  
Data Bank 23

According to the information that was available during the validation procedure, we have determined that fifteen data sets of Service Segment Data, Data Bank 23 were transferred to the National Archives. These data sets have been validated.

The validation procedure involved the manual comparison of the Civil Aeronautics Board (CAB) Master Data File Description with two records from each data set. The results of the validation are as follows:

Do discrepancies occur between the records and the CAB Master Data File Description?

Yes No ..... Record Format

Yes No ..... Record Length

--- For data set "Service Seg.1970": While the Master Data File Description lists the minimum record length as 364, all of the records for this data set are 324 characters long.

Yes No ..... Starting Position

Yes No ..... Field Length

Yes No ..... Type of Data

--- For 9 data sets (Service Seg.1975 - 1980, and Service Seg.1982 - 1984): "Filler" (field #9) should be blank, however this field contains two alphabetic characters, which actually represent a carrier code.

--- For 13 data sets (Service Seg.1970 and Service Seg.1973 - 1984): "Filler" (field #23) should be blank, but this field contains a two digit number.

--- For 3 data sets (Service Seg.1982 - 1984): For data element "Repeating segment count" (field #6) a numeric field, there are alphabetic characters in the data. For example, some records contain the value "0A".

--- For all data sets: For data element "Service class" (field #15) the record layout lists numeric as the data type, but all records are alphabetic, which is valid according to the description of data and note #2.

Yes No ..... Data Representation

Validation Statement  
Service Segment Data,  
Data Bank 23

Yes No .... During the validation procedure, was all of the essential documentation available in order to validate the codes?

--- For all data sets: For data elements "City/airport (1) numeric code (field #4) and "City/airport (2) numeric code 9 (field #7) the codebooks available are the quarterly Passenger Origin and Destination Survey: City/Airport Nomenclature (Data Bank 5) electronic files. National Archives staff member Michael Meier ran a 10% random sample of the data in Data Bank 5. Using SAS, Meier ran frequencies on the following variables: Airport Designator; City Airport Code; Multiple Airport Alpha; Numeric Sequence Code; and World Area Code. Printouts of the random sample was used during this validation process.

Were there discrepancies noted between the codes in the records and the codes listed in the data file description, codebook, notes, and/or notices?

Yes No NA .... Under column "Description of Data"  
Yes No NA .... On File Description Notes

--- For 4 data sets "Service Seg.1970-73": For data element "Itinerary indicator" (field #20) the value "1" is not valid, according to the record description notes. However, the value "1" is valid according to Service Segment Data File Introductory Notes item #13.

Yes No NA .... In codebooks

--- For data set "Service Seg.1970": For data elements "Aircraft group code" (field #16) and "Aircraft type code" (field #17), the combination of the values "5" and "22" does not appear in the codebook.

Yes No NA .... In memoranda to users of the data

Yes No NA .... In Data Bank 5 SAS 10% Random Sample CAB Validation

Shannon Smith revised this validation statement on 4/10/92.  
P. D. Palmer reviewed this validation statement on 4/10/92.

**APPENDIX  
OF  
AIRCRAFT TYPE  
CODES**

*Page 2 of 10*

**8-1.0**

## AIRCRAFT TYPE CODES

This Appendix sets forth types of aircraft for reporting purposes and provides codes for reporting service segment and Form 41 data on ADP media.

General aircraft groupings, aircraft types, and cabin configuration shall be indicated by a four-digit code as follows: aircraft group (one-digit code in the high order position), aircraft type (two-digit code in intermediate positions), and cabin configuration (one-digit code in low order position). Thus, a Boeing 747 aircraft in passenger configuration would be coded as jet, four-engine (8), aircraft type (16) and configuration (1), and would be written as 8161.

The codes to be used are:

<u>Aircraft Group (High order position)</u>	<u>Code</u>
Piston, 1-engine	0
Piston, 2-engine	1
Piston, 4-engine	2
Helicopter/STOL	3
Turbo-prop, 1- and 2-engine	4
Turbo-prop, 4-engine	5
Jet, 2-engine	6
Jet, 3-engine	7
Jet, 4-engine	8

<u>Cabin Configuration (Low order position)</u>	<u>Code</u>
Passenger-only cabin configuration	1 (See Notes 1
Cargo-only cabin configuration	2 Through 3
Combination cargo-passenger cabin configuration	3 Page 8-10.0.

AIRCRAFT TYPE CODES (CONT'D)

<u>AIRCRAFT CODE</u>	<u>AIRCRAFT TYPE</u>
007	AERO COMMANDER 200
008	AERO MACCHI

## AIRCRAFT TYPE CODES (CONT'D)

### Notes:

#### 1. Passenger-only cabin configuration, Code 1:

Use Code 1 for all aircraft commonly used in passenger cargo service where the above-deck cabin is reserved exclusively for the carriage of passengers.

#### 2. Cargo-only cabin configuration, Code 2:

Use Code 2 for aircraft configured for provision of all-cargo services.

#### 3. Combination cargo-passenger cabin configuration, Code 3:

Use Code 3 in those rare circumstances where the above-deck cabin is physically divided by a barrier with one portion containing seats for the carriage of passengers and another portion exclusively reserved for the carriage of cargo. (Do not confuse this configuration with the common above/below deck configuration which is Code 1.)

#### 4. The three-digit ADP Aircraft Codes listed on previous pages include the aircraft Group Code (in the high order position) as well as the Aircraft Type and Model Code. Therefore, only an appropriate Cabin Configuration Code need be added to complete the four-digit code.

CIVIL AERONAUTICS BOARDBUREAU OF ACCOUNTS AND STATISTICSPASSENGER ORIGIN-DESTINATION DIRECTIVESNO.: 4ISSUE DATE: September 21, 1972 DATE: Immediately

EFFECTIVE

Section	<u>IV</u>
Subsection	<u>D</u>
Paragraph	<u>3b</u>

SUBJECT: Carrier Code for British Island Airways, Ltd.

The two-letter carrier code designator "UK" is assigned to British Island Airways, Ltd. This creates a conflict in O & D Survey reporting, since the code "UK" is used to designate an "unknown" carrier in the routing information in the Survey data reported to the Board.

For Survey purposes, you should continue to use the code "UK" to designate an unknown carrier. In respect to British Island Airways, Ltd., you may, at your option, also use the code "UK" to identify that carrier or you may substitute the unofficial code "BS". Both of these latter codes will be acceptable for British Island Airways in our computer editing of your Survey reports. The use of two codes for British Island Airways will have only a minimal effect on the Survey outputs since British Island's traffic volume is quite small and relatively few records in the Survey will be affected.

Sincerely yours,

W. Fletcher Lutz  
Director, Bureau of  
Accounts and Statistics

Table of Contents - City/Airport Code Lists

<u># Pages</u>	<u>Subject</u>	<u>Effective Date</u>
8	Official Airlines Guide City/Airport Codes	June 1988
5	City/Airport Codes for Passenger O & D Survey for the Fourth Quarter of 1972 (Passenger O & D Directive Number 9)	Oct. 1, 1972
5	City/Airport Codes for Passenger O & D Survey for the First Quarter of 1973 (Passenger O & D Directive Number 10)	Jan. 1, 1973
5	City/Airport Codes for Passenger O & D Survey for the Second Quarter of 1973 (Passenger O & D Directive Number 13)	Apr. 1, 1973

# CURRENCY CODES

## CONTENTS

"HOW TO USE" SECTION .....	38-42
ABBREVIATIONS AND REFERENCE MARKS .....	2, 3
ACCEPTANCE OF CREDIT CARDS .....	1637, 1638
AIR CARGO FLIGHTS — Schedules & Information (See OAG Air Cargo Guide)	
AIRCRAFT PERFORMANCE STATISTICS .....	43
AIRLINE INDEX .....	44-50
AIRLINE SERVICE INFORMATION PAGES .....	T-1 - T-72
AIRPORT (INTERNATIONAL) CHECK-IN REQUIREMENTS .....	32-34
BANK AND PUBLIC HOLIDAYS .....	36, 37
CARGO SCHEDULES & INFORMATION — (See OAG Air Cargo Guide)	
CARRIER SERVICE INFORMATION PAGES .....	T-1 - T-72
CITY (AIRPORT) CODES .....	65-71
CONNECTING TIME INTERVALS .....	51-64
CREDIT CARD ACCEPTANCE .....	1637, 1638
CURRENCY CODES .....	1
EXCURSION FARE NOTES .....	8-15
FARES INFORMATION Application of Fares and Fare Notes .....	8-15
Local Taxes — By Country .....	16-21
Transportation Taxes — U.S. .....	22-25
FLIGHT ITINERARIES (Flight Segments) .....	72-83
FLIGHT SCHEDULES Cargo (See OAG Air Cargo Guide)	
Passenger — Point to Point Listings with Fares .....	84
HOW TO USE OAG .....	38-42
INDEX OF AIRLINES .....	44-50
INTERNATIONAL AIRPORT CHECK-IN REQUIREMENTS .....	32-34
INTERNATIONAL BAGGAGE ALLOWANCES AND RATES .....	27-29
INTERNATIONAL STANDARD TIME CHART .....	30
ITINERARIES (Flight Segments) .....	72-83
MINIMUM CONNECTING TIMES .....	51-64
MONEY (CURRENCY) CODES .....	1
PUBLISHER'S INFORMATION PAGE .....	4
STOP PRESS .....	5
TAXES — LOCAL (By Country) .....	16-21
TRANSPORTATION TAXES .....	22-25

PASSENGER ORIGIN-DESTINATION DIRECTIVES

NO.: <u>9</u>	ISSUE DATE: <u>November 16, 1972</u>	EFFECTIVE DATE: <u>October 1, 1972</u>
		Section <u>V</u> and <u>IX</u>
		Subsection <u>D</u> <u>C</u>
		Paragraph <u>3a</u>

SUBJECT: List of Valid City/Airport Codes for Fourth Quarter 1972  
Passenger O & D Survey Report

We are transmitting the enclosed list of three-letter city/airport codes for your information and use in preparing your company's passenger origin-destination survey report for the fourth quarter of 1972. A deck of supporting punched cards containing these codes, in the format described in section IX-C of the "Instructions to Air Carriers for Collecting and Reporting Passenger Origin-Destination Survey Statistics", is also enclosed unless your company has requested that the punched cards be sent directly to the addressee shown below.

This list was compiled from the North American and International Editions of the Official Airline Guide for the three months of the quarter. In your processing of survey data, you may encounter city/airport codes which do not appear on this list. In such cases, use a code for such a point which may appear in the Guides for any month of the fourth quarter. When no code is shown in the Guides, assign a code of your own choosing, selecting a three-letter combination other than one that appears in the enclosed list or in the Guides for any month of the quarter. Your company's letter transmitting the O & D report for the fourth quarter 1972 to this Bureau must itemize any such code assignments which your company has made.

  
W. Fletcher Lutz  
Director, Bureau of  
Accounts and Statistics

Enclosures (2):  
List of city/airport codes, and  
Deck of supporting punched cards  
unless sent to addressee below:

CIVIL AERONAUTICS BOARD  
BUREAU OF ACCOUNTS AND STATISTICS  
PASSENGER ORIGIN-DESTINATION DIRECTIVES

NO.: <u>10</u>	ISSUE DATE: <u>February 8, 1973</u>	EFFECTIVE DATE: <u>January 1, 1973</u>
		Section <u>V</u> and <u>IX</u>
		Subsection <u>D</u> <u>C</u>
		Paragraph <u>3a</u>

SUBJECT: List of Valid City/Airport Codes for First Quarter 1973  
Passenger O & D Survey Report

We transmit the enclosed list of three-letter city/airport codes for your information in preparing your company's passenger origin-destination survey report for the first quarter of 1973. A deck of supporting punched cards containing these codes, in the format described in section IX-C of the "Instructions to Air Carriers for Collecting and Reporting Passenger Origin-Destination Survey Statistics", is also enclosed unless your company has requested that the punched cards be sent directly to the addressee shown below.

This list was compiled from the North American and International Editions of the Official Airline Guide for the first two months of the quarter. In your processing of survey data for the quarter, you may encounter city/airport codes which do not appear on this list. In such cases, use a code for such a point which may appear in the Guides for any month of the first quarter of 1973. When no code is shown in the Guides, assign a code of your own choosing, selecting a three-letter combination other than one that appears in the enclosed list or in the Guides for any month of the quarter. Your company's letter transmitting the O & D report for the first quarter 1973 to this Bureau must itemize any such code assignments which your company has made.

W. Fletcher Lutz  
Director, Bureau of  
Accounts and Statistics

CIVIL AERONAUTICS BOARD

BUREAU OF ACCOUNTS AND STATISTICS

PASSENGER ORIGIN-DESTINATION DIRECTIVES

NO.:	ISSUE DATE:	EFFECTIVE DATE:
13	May 14, 1973	April 1, 1973
		Section V and IX
		Subsection D C
		Paragraph 3a

SUBJECT: List of Valid City/Airport Codes for Second Quarter 1973  
Passenger O & D Survey Report

We transmit the enclosed list of three-letter city/airport codes for use in the preparation of your company's passenger origin-destination survey report for the second quarter of 1973. A deck of supporting punched cards containing these codes, in the format described in section IX-C of the "Instructions to Air Carriers for Collecting and Reporting Passenger Origin-Destination Survey Statistics", is also enclosed unless your company has requested that the cards be sent directly to the addressee shown below.

This list was compiled from the North American and International Editions of the Official Airline Guide for the first two months of the quarter. In your processing of survey data for the quarter, you may encounter city/airport codes which do not appear on this list. In such cases, use a code for such point which may appear in the Guides for any month of the second quarter of 1973. When no code is shown in the Guides, assign a code of your own choosing, selecting a three-letter combination other than one that appears in the enclosed list or in the Guides for any month of the quarter. Your company's letter transmitting the O & D report for the quarter to this Bureau must itemize any such code assignments which have been made.

  
W. Fletcher Lutz  
Director, Bureau of  
Accounts and Statistics

Enclosures (2):  
List of city/airport codes, and  
Deck of supporting punched cards  
unless sent to addressee below:

# WORLD AREA CODES

**Mailing Address:**

Department of Transportation  
Office of Airline Statistics  
Data Administration Division  
400 7th Street, SW  
Washington, DC 20590

Telephone: (202) 366-4373

**FEBRUARY 1991**

FEB, 1991

**INTRODUCTION:**

This document contains the numeric "World Area Codes" used to identify geopolitical areas such as, countries, states (U.S.), provinces (Canada), and territories or possessions of certain countries. The codes are used within the various data banks maintained by the Office of Airline Statistics (OAS). This document will be updated and reissued on a yearly basis. Users may also access ROSCOE member "LL.WAC" to display any interim changes.

For further information, or to request that your name be added to the distribution list, contact Vicki Bradford, Room 4125, telephone: 366-4393.

AREA 1 - MIDDLE AMERICA

106 - Belize  
 110 - Costa Rica  
 118 - El Salvador  
 127 - Guatemala  
 131 - Honduras  
 148 - Mexico  
 153 - Nicaragua  
 162 - Panama Republic

AREA 2 - CARIBBEAN, BAHAMAS, and BERMUDA

202 - Anguilla, BWI-UK  
 204 - Bahamas  
 205 - Barbados  
 206 - Antigua and Barbuda  
 207 - Bermuda-UK  
 219 - Cuba  
 221 - Dominica  
 224 - Dominican Republic  
 233 - Cayman Islands, BWI-UK  
     Includes: Grand Cayman, Cayman Brac, Little Cayman  
 235 - Guadeloupe-France  
     Includes: French Antilles  
 238 - Haiti  
 243 - Jamaica  
 252 - Martinique-France  
 256 - Montserrat, BWI-UK  
 259 - Netherlands Antilles-Netherlands  
 273 - Grenada & South Grenadines (Includes Carriacou)  
 275 - St. Kitts and Nevis  
 276 - St. Lucia  
 277 - Aruba \*/  
 279 - St. Vincent & North Grenadines  
     Includes: Union Island, Mustique , Palm Island  
 280 - Trinidad & Tobago  
 281 - Turks & Caicos Islands - UK  
     Includes: Providenciales  
 282 - Virgin Islands -UK

---

A "Constitutional Conference Agreement on Separate Status" was granted to Aruba by the Dutch on January 1, 1986 with a target date of 1996 for its official independence. While it has not yet become "officially independent", it has been given a unique code in recognition of its current status.

WORLD AREA CODES FEB, 1991

AREA 3 - SOUTH AMERICA

303 - Argentina  
312 - Bolivia  
316 - Brazil  
324 - Chile  
327 - Colombia

Includes: San Andres Island

337 - Ecuador  
340 - Falkland Islands-UK  
344 - French Guiana-France  
350 - Guyana  
365 - Paraguay  
368 - Peru  
379 - Surinam  
385 - Uruguay  
388 - Venezuela

AREA 4 - EUROPE

401 - Albania  
402 - Andorra  
403 - Austria  
409 - Belgium  
411 - Bulgaria  
417 - Czechoslovakia  
419 - Denmark  
425 - Finland  
427 - France  
    Includes: Corsica  
428 - 1/  
429 - Germany 1/  
430 - 1/  
431 - Gibraltar-UK  
433 - Greece  
437 - Hungary  
439 - Iceland  
441 - Ireland (Eire)  
450 - Italy  
454 - Luxembourg  
456 - Malta  
458 - Monaco  
461 - Netherlands  
465 - Norway

1/ New Code

2/ Previously WAC 800, 807, 809, 826, 834, 841, 842, and 888.

Retired World Area Codes As of January 1, 1989

The following World Area Codes were previously assigned to the locations named, but have been changed to reflect the "Current World Area Code", effective as indicated.

<u>Retired World Area Code</u>	<u>Current World Area Code</u>	<u>Effective Date</u>
160 - Panama Canal Zone	162	1/80
174 - San Andres Island	327	1/89
209 - Carriacou	273	1/83
210 - Cayman Brac	233	1/85
234 - Grand Turk	281	1/85
257 - Mustique	279	1/89
261 - Nevis	275	1/85
266 - Palm Island	279	1/89
267 - Providenciales	281	1/89
268 - Puerto Rico	003	1/89
274 - Antigua 1/	206	1/84
283 - Virgin Islands	004	1/89
428 - East Germany	429	10/90
430 - Berlin	429	10/90
506 - Canary Islands	482	1/89
532 - Ifni-Morocco 2/	548	1/89
540 - Madeira Islands	469	1/89
561 - Principe Island	567	1/77
594 - Burkina Faso 3/	593	1/89
599 - Zimbabwe 4/	565	1/89
667 - Peoples Democratic Republic of Yemen	694	5/90

- 1/ WAC 206-Barbuda changed to "Antigua & Barbuda" in 1983, but WAC 274 was not dropped until 1984.
- 2/ Ifni-Morocco inadvertently dropped due to typographical transposition of codes with Ivory Coast effective 1/83. Actual consolidation in Master Coordinate File effective 1/89, however.
- 3/ Burkina Faso (formerly Upper Volta) should have retained WAC 593 but was assigned 594 in 1986. Corrected 1/89.
- 4/ Zimbabwe (formerly Rhodesia) should have retained WAC 565 but was assigned WAC 599 in 1981. Corrected 1/89.

## WORLD AREA CODES FEB. 1991

Retired World Area Codes As of January 1, 1989 (continued)

705 - Bonin Islands	736	1/89
759 - North Vietnam	791	1/77
761 - Okinawa/Ryukyu Islands	736	1/84
772 - Sabah, Malaysia	749	1/75
773 - Sarawak, Malaysia	749	1/75
780 - South Vietnam	791	1/77
800 - American Samoa	005	1/90
807 - Canton Islands	005	1/90
809 - Palau Islands	005	1/90
826 - Guam Island	005	1/90
834 - Johnston Island	005	1/90
841 - Commonwealth of Northern Mariana Islands	005	1/90
842 - Midway Islands	005	1/90
888 - Wake Island	005	1/90
843 - Marshall Islands	844	1/90
849 - New Hebrides */	885	1/89
853 - Norfolk Island	802	1/89
861 - Portuguese Timor	862	1/75
891 - West Irian-Indonesia	832	1/89
		1/75

\* WAC 849-New Hebrides was replaced by WAC 885-Vanuatu in 1981 but WAC 849 was not dropped until 1989.
